GEO Value

Data to Decisions: Valuing the Societal Benefit of Geospatial Information

A workshop organized by the GEOValue community in collaboration with OECD, NASA and USGS.

March 10-11, 2016, OECD, Paris, France

Workshop Objectives:
Define case studies and use cases that assess value by tracing the information flow end-to-end from geospatial data acquisition system to decisions by end users. The goal is to demonstrate and compare approaches to valuation of geospatial information and forge a path forward for research.

Societal impact focus areas:

❖*Disasters* – focusing on resilience to natural disasters, and extreme events

❖*Ecosystems* – highlighting the land-water-energy nexus

Call for Participation: submit 500 word abstract by November 15, 2015 to hazardcenter@ecu.edu

More Information: contact hazardcenter@ecu.edu; For details, see www.socioeconomicbenefits.org

Pre-workshop Tutorial on cost benefit analysis, March 9, 2016, see Verso
